

# **Power Type**

# **NV** Series

### **Features**

- 3.0V operating voltage
- High Capacitance and Low ESR
- Quick charge & discharge
- Environmentally friendly products
- Extended temperature to 85°C
- Humidity resistance @ RH90%

#### Certification

- RoHS & REACH compliant
- UL recognized (File No. MH10260)

### **Recommended Applications**

- Pulse power demand
- Hybrid battery packs
- Power tools

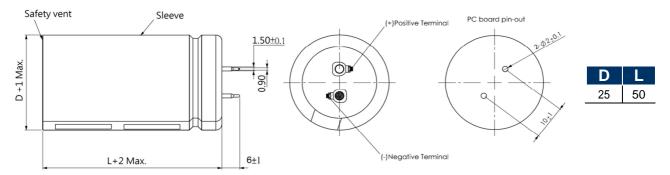

### Specification

| Specification            |                                                |                                             |  |  |  |  |  |  |
|--------------------------|------------------------------------------------|---------------------------------------------|--|--|--|--|--|--|
| Items                    | Character                                      | istics                                      |  |  |  |  |  |  |
| Rated Voltage            | 2.7 V                                          | 3.0 V                                       |  |  |  |  |  |  |
| Operating Temp. (Charge) | -40°C ~ 85°C                                   | -40°C ~65°C                                 |  |  |  |  |  |  |
| Surge Voltage            | 3.15 V                                         |                                             |  |  |  |  |  |  |
| Capacitance Tolerance    | -20% ~ +20% of Rated Capacitance               |                                             |  |  |  |  |  |  |
| Storage Temp.            | -40 °C to 85 °C                                | -40 °C to 70 °C                             |  |  |  |  |  |  |
| Test                     | Endurance                                      | Standards                                   |  |  |  |  |  |  |
| High Temp. Life          | 1000hrs @ Rated Voltage & Max. Operating Temp. |                                             |  |  |  |  |  |  |
| Shelf Life (Non-Charge)  | 1000hrs @ Max. Operating Temp.                 | Must to meet standards as below after test: |  |  |  |  |  |  |
| Life time                | 10 Years @ Rated Voltage & 25℃                 | CAP decline < 30% of Initial measurement.   |  |  |  |  |  |  |
| Cycle Life               | 500,000 Cycles @ 25°C                          | ESR < 2 times specification value.          |  |  |  |  |  |  |
| Cycle Life               | (Operating Between 50%~100% Of Rated Voltage)  |                                             |  |  |  |  |  |  |

%DC IR is calculated by voltage drop( $\Delta V$ ) which is measured by the period of time from discharge start to 10 milliseconds later.
